ATTIC LIVING / LIBRARY AREA - AFTER

Aiming for a modern, joyful style on classic simplicity with a flair of Scandinavian flavour. To compliment and tone down the light blue walls of the area, the colour scheme is introduced with yellow, light grey, shades of different blue tones, black, natural timber frame. The cheerful yellow Knopparp seat, and the freshness of the glass lamp display a modern look.

The two wall light scones reminiscent the timeless beauty of American classic style. In addition, these light fixtures connect to the sophisticated chandelier. A TV screen is set to the wall opposite for entertaining. Industrial metal storage will be a supportive element to the mix. These are the electric blue cabinet and the meshy filing cabinet – add an eclectic tone. Books can be filed here as a source of a mini library for family and friends to enjoy many years to come. The black stepping stool and galvanised pot next to restroom justify a practical approach to styling direction.

Where to keep the umbrella, magazines, odd bits, keys? On this note, it is recommended a galvanised pot on the black stepping stool. A large clock above this practical nook, absolutely transform and add some fun and quirkiness to this space. A rounded stool made of natural jute can be used as a coffee table to tie all the elements together for a complete living space – stylish but yet simple and not overly done. Again, enlarge the space is the key to attic styling, design and decorate!

ATTIC LIVING / LIBRARY AREA – BEFORE

The living / library area of the attic is filled with a coloured scheme of light blue tone to walls, white to borders and balustrade, and mahogany brown to floor coverings. A decorative, classic chandelier anchors the style of this empty space. This area is created for a young lady of the manor – as her quarter for years to come.

So how to transform this space to accommodate a living space where style is modern with a classic edge and eclectic aspiration.
